

Full Stack Developer (f/m/d)

Full time in Berlin

As Engel & Völkers Digital Invest, we want to become a sustainable provider of digital financial solutions in the real estate sector. We focus on financing real estate projects of construction projects, land and existing properties for property developers and project developers.

Become part of our success story and form the future of crowdfunding in real estate. Work together with other innovative people on solutions for investments and real estate financing. Benefit from an outstanding work environment in one of the most attractive European cities – Berlin.

To strengthen our team, we are looking for a Full Stack Developer (f/m/d) to start as soon as possible. We offer an open-ended fulltime contract.

Your responsibilities

As a Full Stack Developer at Engel & Völkers Digital Invest you will be responsible for creating and maintaining the existing Crowd Funding platform. Working with colleagues to help shape the product and deliver an outstanding experience for our customers.

- Development of new and maintenance of existing applications
- Further development to other subsystems, such as web services for interactive dashboards for our customers
- Analysis and performance optimization of our applications and services
- Creation and execution of unit tests or integration tests
- Coordination and cooperation in our interdisciplinary teams
- Devops and AWS management and involvement

Our backend is built on ServiceStack in Dot Net Core (C#) with SQL Server, hosted in AWS. Knowledge of IoC/DI, docker, CI/CD (Azure DevOps), Selenium, Unit Tests, micro service architecture and software design patterns would be advantageous.

We enjoy new technologies and cloud solutions. If you have React or vue.js skills, we are interested to hear from you.

Your profile

You are passionate about developing web applications in Dot Net related technologies across front and backend aspects of development. Capable of taking ownership of tasks until completion with the required care, attention and communication whilst working to deadlines. You bring ideas and innovative solutions to problems along with helping to define a development process as part of a growing team.

This is what we are looking for:

- Experience of 2 + years in developing high-scalable software products
- Experience in C#, ASP.NET MVC, TypeScript, Angular, SCSS, MS SQL and relational databases.
- Pronounced frontend skills allow you to create responsive and beautiful user experiences with a keen eye for detail
- Good knowledge of UX seen as an advantage.
- Minimum requirement JavaScript/HTML/CSS or C#
- Very good understanding of at least one of the following frameworks: React, Angular / AngularJS, Vue.js, ASP.NET MVC or similar
- Proficient in building complex and nice products which are able to handle the requests by thousands of users
- Excellent analytical and problem-solving skills
- AWS and any cloud architectural experience would be beneficial

To work for us we need you to have a working permission for Germany.

What we offer

- Dynamic and attractive working environment and freedom for own ideas
- Individual training and further education
- Responsible and varied tasks
- Competitive compensation
- Modern office directly at Ku'damm in Berlin
- Motivated, agile and technical team
- Start-up with short, direct decision-making paths and a familiar working atmosphere
- Access to the global network of Engel & Völkers
- Flexible working hours and overtime compensation
- Employee events, such as Team events, summer events and Christmas party

Ready for a new challenge?

We are looking forward to your application with your CV, references and earliest start date to be considered for the Full Stack engineering role:
