

Full Stack Developer (f/m/d)

Fulltime / as of now in Berlin

Who we are

Engel & Völkers Digital Invest is part of the global license partner network of Engel & Völkers and one of the leading providers, specialized in the digital financing of premium real estate projects. Our focus is on project financing of construction projects, land and existing properties for property developers and project developers. With digital real estate investments, we also enable private investors to invest in exclusive real estate projects and benefit from attractive interest rates.

As part of the IT team, you will be responsible for creating and maintaining the existing Crowd Funding platform. Let's shape this product and deliver an outstanding experience for our customers. Become part of our success story and benefit from an outstanding working environment in the heart of Berlin!

What to expect

- Development of new and maintenance of existing applications, web services and UI
- Analysis and performance optimization of our applications and services
- Coordination and cooperation in our interdisciplinary teams
- Devops and AWS management and involvement

Our backend is built on ServiceStack in Dot Net Core (C#) with SQL Server, hosted in AWS. We enjoy new technologies and cloud solutions. If you have React or vue.js skills, we are interested to hear from you.

What you should bring

- Experience of 2 + years in developing high-scalable software products
- Experience in C#, ASP.NET MVC, TypeScript, Angular, SCSS, MS SQL and relational databases. Minimum requirement JavaScript/HTML/CSS or C#
- Knowledge of IoC/DI, docker, CI/CD (Azure DevOps), , Unit Tests, micro service architecture and software design patterns would be advantageous
- Pronounced frontend skills allow you to create responsive and beautiful user experiences with a keen eye for details, UX seen as an advantage. Excellent working knowledge of one of the following: React, Angular / AngularJS, Vue.js, ASP.NET MVC or similar
- Excellent analytical and problem-solving skills
- AWS and cloud architectural experience would be beneficial
- Working permission for Germany.

What we offer

- Responsible and varied tasks and freedom for own ideas
- Start-up atmosphere with a family-like working atmosphere and numerous employee events
- Motivated, agile and tech-savvy team and flat hierarchies with short decision-making paths
- Modern open space office directly at Ku'damm in the heart of Berlin
- Access to the global network of Engel & Völkers
- Competitive salary
- Individual further and advanced training
- Flexible working hours, overtime compensation and home office
- Fresh fruit, drinks and an after-work beer with an unbeatable view over City West

Let's create the future together!
